

## **CERTIFICATE OF ANALYSIS**

### **Purified AAV6-empty (Lot 19-540E)**

(for research use only)

### **Storage Conditions**

The AAV vectors should be stored at -80°C for long term usage. When storing for frequent use, 4°C is recommended. Avoid storing at -20°C.

### **Shelf Life**

4 years when stored at -80°C. (AAV)

### **Shipping Conditions**

Ice packs overnight

### **Description**

AAV6-empty was produced in insect Sf9 cells by single infection with rBV-inCap6-inRepCap-kozak-hr2 (V290) (Fig 2).

The vectors were purified through 2 rounds of CsCl ultracentrifugations. The CsCl was removed through buffer exchange with 2 PD-10 desalting columns. The final AAVs are in 1xPBS+100 mM sodium citrate+0.001% pluronic F-68 buffer.

The vectors are for research use only, not for any human use.

### **Capsid Titer**

Lot 19-540E: 1E+13 vg/ mL (final diluted)

### Quality Control Data

The vectors were sterilized with 0.22 $\mu$ m filter. SDS-PAGE and InstantBlue Staining (Expedeon) verified the purity of the vectors (Fig. 1). OD analysis determined the titers of the AAV samples.
